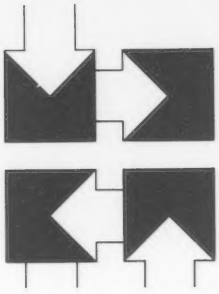
JOURNAL OF PROCESS CONTROL



Index to Volume 4 1994

Number 1 (February) 1–56
Number 2 (May) 57–112
Number 3 (August) 113–176
Number 4 (November) 177–304

Article index

Number 1

Control relevant model reduction: a reduced order model for 'Model IV' fluid catalytic cracking units
F.Z. Tatrai, P. A. Lant, P. L. Lee, I. T. Cameron and R. B. Newell 3
Dynamic interaction and multiloop control system design
H.-P. Huang, M. Ohshima and I. Hashimoto 15
Robustness of multivariable Smith predictors
J.M. Maciejowski 29
Nonlinear optimal control of an alternating activated sludge process in a pilot plant
H. Zhao, S.H. Isaacs, H. Søeberg and M. Kümmel 33
Multivariable generalized predictive adaptive control with a suitable tracking capability
M. M'Saad and G. Sanchez 45

Number 2

Control studies on a model evaporation process – constrained state driving with conventional and higher relative degree systems
F. Y. Wang and I. T. Cameron 59
Feedback-assisted iterative learning control based on an inverse process model
K. S. Lee, S. H. Bang and K. S. Chang 77
Application of adaptive extended horizon control to a pyrometallurgical reactor
A.J. Thornton and P. F. Ebzery 91
Effective interfaces for process operators – a prototype
G. Olsson and P. L. Lee 99

0959-1524/94/04/0300–03
© 1994 Butterworth-Heinemann Ltd

Number 3

Describing function matrix for multivariable systems and its use in multiloop PI design
A. P. Loh and V. U. Vasnani 115
Adaptive non-linear control of a continuous stirred tank bioreactor
G. Roux, B. Dahhou and I. Queinnec 121
Functional state modelling approach for bioprocesses: local models for aerobic yeast growth processes
X.-C. Zhang, A. Visala, A. Halme and P. Linko 127
Optimal protein separations with time lags in control functions
F. Y. Wang and Q. Yu 135
Nonlinear PI-controller design for a continuous-flow furnace via continuous gain scheduling
M. K. F. Knoop and J. A. Moreno Pérez 143
Bilinear approximations of a nonlinear distributed fixed-bed reactor model
X.-M. Hua 149
State and parameter estimation for adsorption columns by nonlinear distributed parameter state observers
M. Mangold, G. Lauschke, J. Schaffner, M. Zeitz and E.-D. Gilles 163

Number 4

Analysis of operating data for evaluation, diagnosis and control of batch operations
B. R. Bakshi, G. Locher, G. Stephanopoulos and G. Stephanopoulos 179
An efficient dynamic model for batch distillation
J. R. Bosley, Jr. and T. F. Edgar 195
Control strategies for reactive batch distillation
E. Sørensen and S. Skogestad 205
Optimal control of batch reactors by iterative dynamic programming
R. Luus 218
Model based feedback inventory controller for intermediate storage in batch processes
G. Yi and G. V. Reklaitis 227
Batch unit optimization with imperfect modelling: a survey
P. Terwiesch, M. Agarwal and D. W. T. Rippin 238
Practical considerations in using model-based optimization for the scheduling and planning of batch/semicontinuous processes
M. G. Zentner, J. F. Pekny, G. V. Reklaitis and J. N. D. Gupta 259
Batch production control in a computer integrated manufacturing environment
L. Puigjaner, A. Huercio and A. Espuña 281
A novel model-based approach to optimization and control design of batch processes
Z. Verwater-Lukszo and G. Otten 291
